This document summarizes the Technology Standards and Services Task Force recommendations for computer software. Decisions for recommended software are based on need, available resources, and enterprise application requirements. The University recognizes that software is in constant flux and, consequently, is committed to revising these standards on a regular basis. Hardware requirements for software will be evaluated prior to installation to ensure that the software is compatible with the existing platform. If a hardware upgrade is required, the system will be replaced provided funds are available.

The following desktop computer applications are available through campus-

The following software may be purchased independently, for individual use, provided it is appropriately justified for need. The individual is responsible for storing proof of purchase, the license agreement, and user documentation. IT will provide limited support for these
